PROJECTS

iOS Runtime Modification – “Groups” | *Objective-C, Theos*

March 2020 – Present

- Designed an intuitive method to allow users to organize conversations within the native iOS Messages application aimed to enhance user experience.
- Continued development up to ~9000 lines of code to introduce new features, fix occasional bugs, and support the latest usable version of iOS.
- Published program to websites resulting in 10K+ downloads.

“Saint Luna” Website | *HTML/CSS, JavaScript, PHP*

May 2021 – Present

- Designed, developed, and launched a responsive website for a newly formed, local band.
- Implemented PHP to send emails when a user wants to send the band a message or purchase their merchandise.
- Continued maintenance to keep users notified about the band’s upcoming live shows, newly released music, and new merchandise offers.

Portfolio Website | *TypeScript, Next.js, CSS*

July 2022 – Present

- Designed, developed, and launched a responsive website to share information about myself and to showcase the projects that I’ve worked on.
- Implemented Email.js to send emails when a user wants to send me a message.
